

From Dr. Neil Shah

Fellow patriot,

The radical left is destroying our country and our state.

Vaccine mandates and vaccine passports, ideas that were conspiracy theories 12 months ago, are now a reality in Minnesota.

Our schools are failing our kids worse than ever, with anti-science measures that set kids back, and racist, marxist indoctrination that is creeping into the state curriculum.

And while Inflation surges, making life that much harder for all of us, our government plans to spend a \$10 Billion surplus on more waste, fraud and abuse. I say GIVE IT BACK to us!

Our society is at an inflection point. People are waking up to the deceit!

I spent most of my life relying on Republican career politicians to defend our liberties. This was a mistake. It's time for ordinary Minnesotans to take charge of government again.

I'm a doctor, small business owner, husband and father of three. My work is important - I surgically remove skin cancers for a living. But there's a bigger cancer that needs to be removed:

Career politicians who are destroying our state.

Since launching our campaign six months ago, we've been at the heart of the fight for medical freedom. New activists and even disaffected Democrats all are joining our campaign. People are waking up and hungry for a fighter.

We have the momentum. We have the winning ideas

And I am the only candidate that can take us over the finish line and defeat Tim Walz in November.

It's time we play by a different playbook in elections. We can't afford to lose another race. It's time we choose an outsider who is willing to fight against the Radical Left.

I will end all mandates on day one, ban Critical Race Theory from our schools, re-secure our streets, and actually cut taxes and spending. And, most importantly, I will pass the Never Again Bill to ensure we never have a Governor shut down our state and take away our freedoms again.

I humbly ask for your vote in today's straw poll, and for your vote as a delegate. Thank you.
